

Tõrnu isoteermine ja paigalduskavused:

Lühinõut	Sari 22			Sari 23			Sari 24			Sari 25		
Demim	s	a	b	s	a	b	s	a	b	s	a	b
10..4,9	30	110	70	4,0	150	90	50	150	90	60	170	100
50..89	40	130	80	5,0	170	100	60	170	100	80	210	120

The diagram illustrates the installation of a thermal insulation system on a wall. It shows a cross-section of the wall with insulation panels of varying thicknesses. The panels are labeled with their respective thermal resistance values (R) and are arranged in a staggered pattern. The wall thicknesses are indicated as 10..4,9 cm and 50..89 cm. The insulation panels are labeled with their respective thermal resistance values (R) and are arranged in a staggered pattern.

MÄRKUSED:

1. Kulumääravõrrehtide keldiruumisoleva kondensaadi ehitamise vastu, tõrjuda De väiksem kui 4,9mm, 20mm pakuse, De suurem kui 50mm, 30mm pakuse isolatsiooniga kinnitaks
2. Soojaveevõrrehtide sooleenda põrsest toodud /tabeli sarj 23 /suurel, kahteks al foolium
