$$\overline{1:5}$$

The technical drawing shows a roof plan with three main components:

- Terrassilaud 28x145mm**: A rectangular board with a width of 28mm and a length of 145mm. It has a small circular hole near one end.
- PHL 45x45mm**: A square tile with a side length of 45mm. It features a central circular hole and four smaller holes at the corners.
- IMMUT. MÄND**: A rectangular manure piece with a width of 45mm and a length of 195mm. It has a central circular hole and two smaller holes at the ends.

The drawing also includes various dimensions and annotations:

- A total width dimension of 295mm is shown across the top.
- A horizontal distance of 145mm is indicated between the center of a terrace board and the center of a manure piece.
- A vertical distance of 58mm is shown from the bottom edge to the center of a manure piece.
- A small circular hole is located 73mm from the left edge of a manure piece.
- A small circular hole is located 45mm from the right edge of a manure piece.
- A small circular hole is located 36mm from the bottom edge of a manure piece.
- A small circular hole is located 25mm from the bottom edge of a manure piece.
- A small circular hole is located 60mm from the right edge of a manure piece.
- A small circular hole is located 200mm from the right edge of a manure piece.
